Senior System Associate

Job Description:

- **Software Development:** Experienced developer proficient in Java, JavaScript, HTML, CSS, Bootstrap, JSON, jQuery, Node.js, and React.js, with a strong track record of creating responsive web applications and contributing to collaborative development projects.
- **SQL Script Development:** Develop and validate Oracle SQL scripts to support data verification processes.
- **Automation Testing:** Experienced in using JSONs for automation testing within the Finacle environment.
- **Business Requirement Analysis:** Collaborate in the analysis of business requirements, translating them into comprehensive test cases to ensure software meets business needs.
- **Problem Solving:** Proactively suggest and analyze alternative methods and procedures to address challenges and enhance testing processes.
- **Issue Resolution and Documentation:** Expertly troubleshooted issues, meticulously documented processes, maintained review checklists, and crafted reference implementations.

Personal Details

Name : Rakesh N

Father's Name : Narayanan A

Date of Birth : 23-09-2000

Nationality : Indian

Marital Status : Single

- **Production Support Evaluation:** Played a pivotal role in production support, working closely with the Technical Manager to evaluate the feasibility of implementing roadmap features for releases. Provided valuable input on scope, quality objectives, and resource availability, and proposed adjustments to scope when necessary.
- **Task Estimation and Planning:** Coordinated the estimation of tasks leading up to a release and actively contributed to the planning process. Ensured that task estimates seamlessly integrated into the project plan.

Technologies

- **Integrated Development Environments (IDEs):** Eclipse for Java development and Visual Studio Code for Web Technologies.
- **Back-End Development Tools:** Express.js for building Node.js-based server applications and Postman for API testing and development.
- **Database Tools:** Oracle SQL Developer for database management.
- **Testing Tools:** JUnit for Java unit testing. Tricentis Tosca and FinAx for Finacle UI and API testing.
- **Miscellaneous:** TechOnline and FPMS for internal TOL management.

Declaration

I hereby declare that all statements made in his resume are true and complete to the best of my knowledge and belief.

Yours faithfully,

Rakesh N
